

# URBAN MINING

## Residential Dropoff Accepted Electronics Materials

In an effort to best serve our customers and protect our employees' health and safety we have compiled a list of our most commonly accepted e-waste materials followed by a list of items we do not accept at our facility. If at any point we receive any materials on the non-accepted list you will be contact by your account manager to arrange pick up from our facility. We will be unable to provide any transportation or processing of material found on our non-accepted list not approved by the Urban Mining Safety Department. If material is unable to be removed within 30 days Urban Mining will dispose of said material through the appropriate channels and will invoice the client for the full amount plus labor.
